

# Introducing Nimble - A New Cutting Edge Procurement Solution for 2026

Introducing Nimble, a transformative SaaS procurement platform powered by i2B

*Nimble*

**i2B**

For over 25 years, i2B has been empowering global businesses to transform their procurement and purchase-to-pay processes. We've partnered with a diverse range of clients, including many with multi-billion dollar turnovers, providing them with cutting-edge software solutions that drive significant efficiency gains and cost savings.

Our proven track record on a global scale speaks for itself – we help organizations streamline their procurement operations, optimize spending, and achieve tangible results.

Nimble - Powered by i2B will deliver these results for clients in startup, early funding or SME status

# Nimble Key Features

## Intelligent Automation

Nimble's AI-powered automation streamlines your purchasing repetitive tasks, saving you and your teams time and effort.

## Customizable Dashboards

Build personalized dashboards to track key metrics and gain insights at a glance. These are powered by i2B DataKITE

## Seamless Integrations

Nimble seamlessly integrates with your suppliers, creating a centralized hub for all your procurement workflows.

## Advanced Analytics

Powerful spend data analytics and reporting features provide deep visibility into your business performance.

**Explore the cutting-edge features that make Nimble the ultimate SaaS solution.**

# **Nimble Cost Savings Buyers Time**

**"I've saved at least 1-2 hours a day, dealing with purchase order updates, chasing order, emails, reminders" - Aggreko**

**Nimble allows re-allocation of time to other projects and activities that are helping drive your business and bottom-line (e.g. supplier reviews, sourcing, lead time analysis, negotiating better pricing)**

# Nimble Cost Savings On-Time POs

**i2B has been tracking purchase order data for our customers for the past 25 years, with millions of individual lines.**

**That data shows a huge jump in on-time deliveries (between 30% and 65% on average) when using i2B.**

# Nimble Cost Savings Data Entry / Data Changes

One of the most notable disadvantages of manual data entry (updating your purchase orders, changing delivery dates) is the introduction of inaccuracies. Even the best employess on your team are only human and prone to occasional mistakes\*

\* 1% average human error
